

SALES DATA ANALYSIS **(DASHBOARD CREATION)**

NAME: P.S. ARCHITHA

1. Dataset description

The dataset used is Amazon sales dataset. This data set includes 2 tables "List of orders" and "Orders breakdown" which are connected by the key "Order ID". The first table contains the following attributes:

- Order ID (Nominal)
- Order Date (Interval)
- Customer Name (Nominal)
- City (Nominal)
- Country (Nominal)
- Region (Nominal)
- Segment (Nominal)
- Ship Date (Interval)
- Ship Mode (Categorical)
- State (Nominal)
- Lon (Longitude) (Numeric)
- Lat (Latitude) (Numeric)

The second table contains the following attributes:

- Order ID (Nominal)
- Product Name (Nominal)
- Discount (Numeric)

- Sales (Numeric)
- Profit (Numeric)
- Quantity (Numeric)
- Category (Categorical)
- Sub-Category (Categorical)

2. Dashboard Creation

Tool used: Power BI

Steps to create the dashboard:

- Open Microsoft Power BI and click on the icon showed below to import data from excel

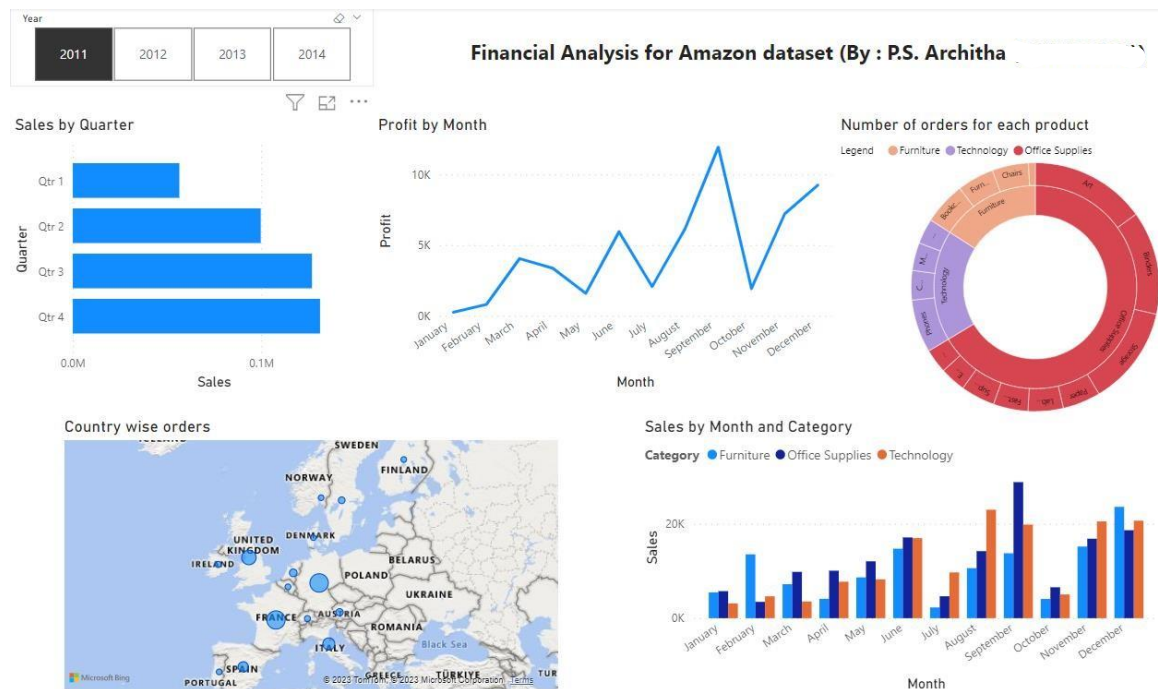

- After loading the data into power BI, Drag the visualizations required from the ‘Visualizations’ panel that is on the right side
- After selecting the required visual, populate it with appropriate data fields by dragging the data fields from the dataset to the field bars associated with the visualization.

Example: Here the selected idiom is sunburst map and the necessary data fields are dropped under ‘Groups’ and ‘Values’.

- After building the visual you can format it using the format your visual button circled in the above image.
- Create multiple necessary visuals to complete your dashboard.

3. The Dashboard

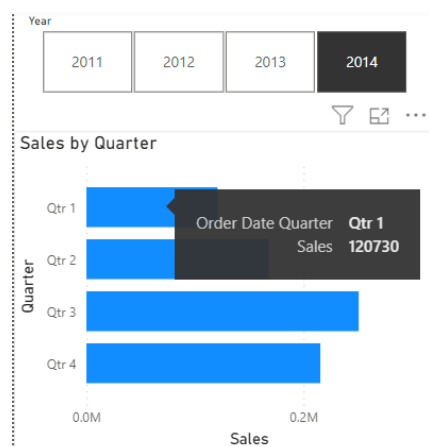

The above dashboard contains the following visualizations:

- Horizontal Bar Chart
- Line chart
- Sunburst map
- Symbol map
- Grouped bar chart

The dashboard is helpful for financial analysis of this sales dataset. It includes a filter that can show these visualizations for different years from 2011 to 2014. The above image showcases the financial analysis for the year 2011. When hovered over each visualization it gives us more information

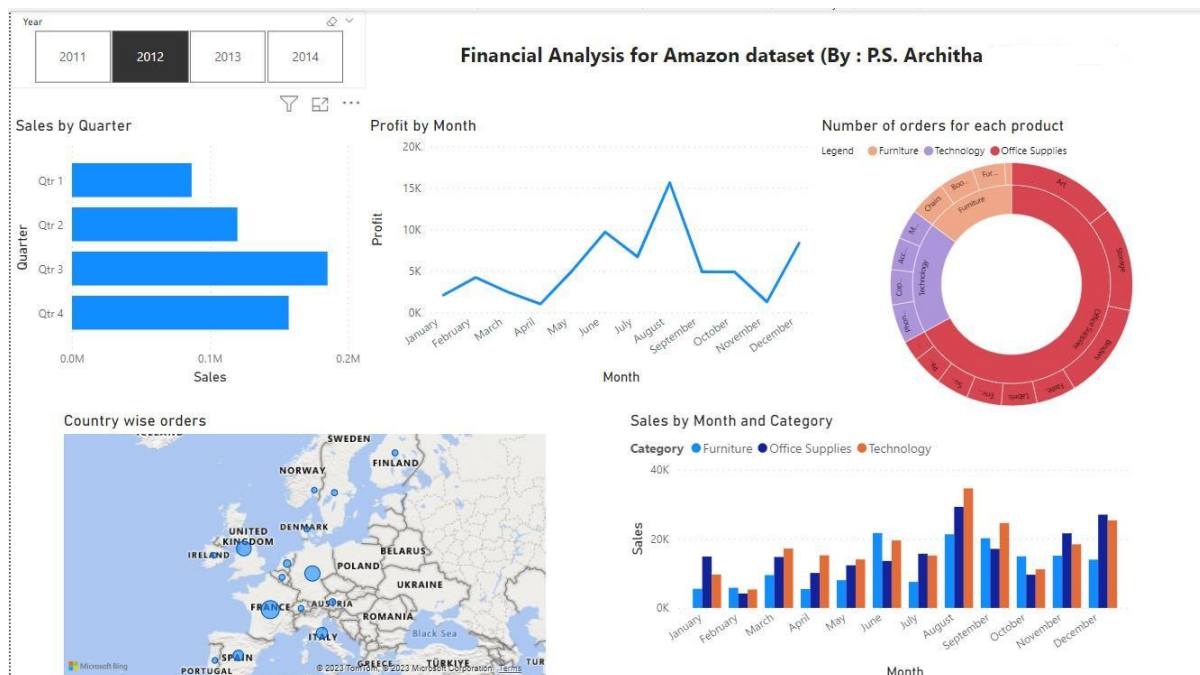

Examples:

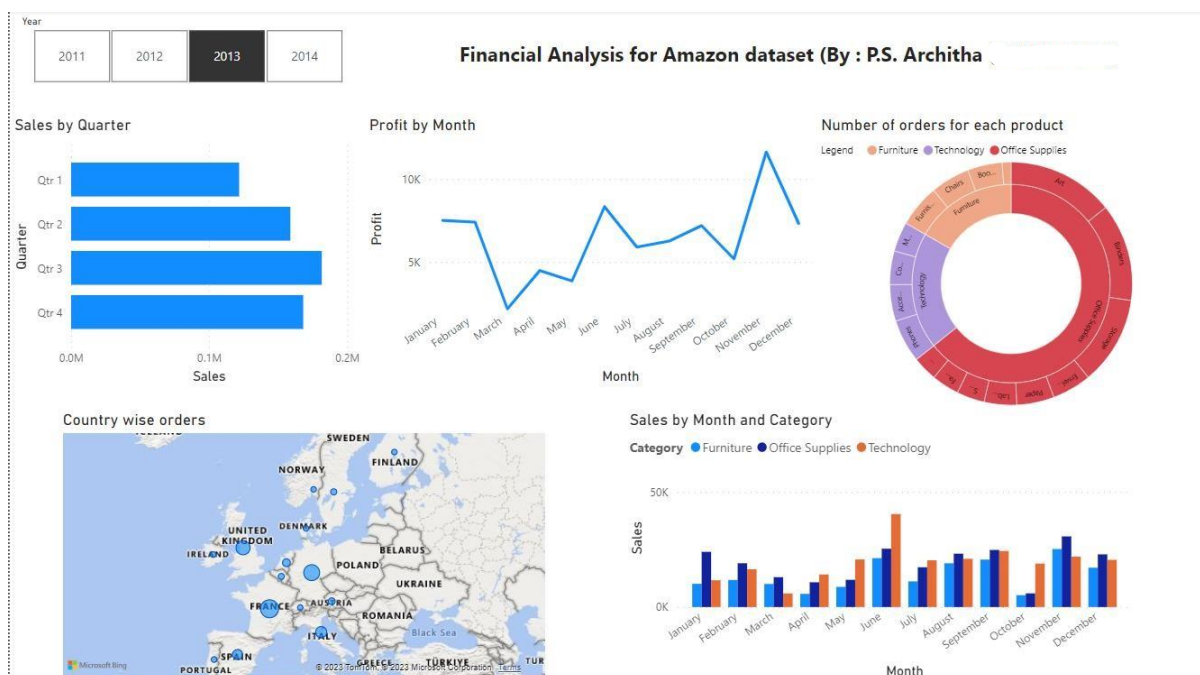

The financial analyses for the other years are attached below.

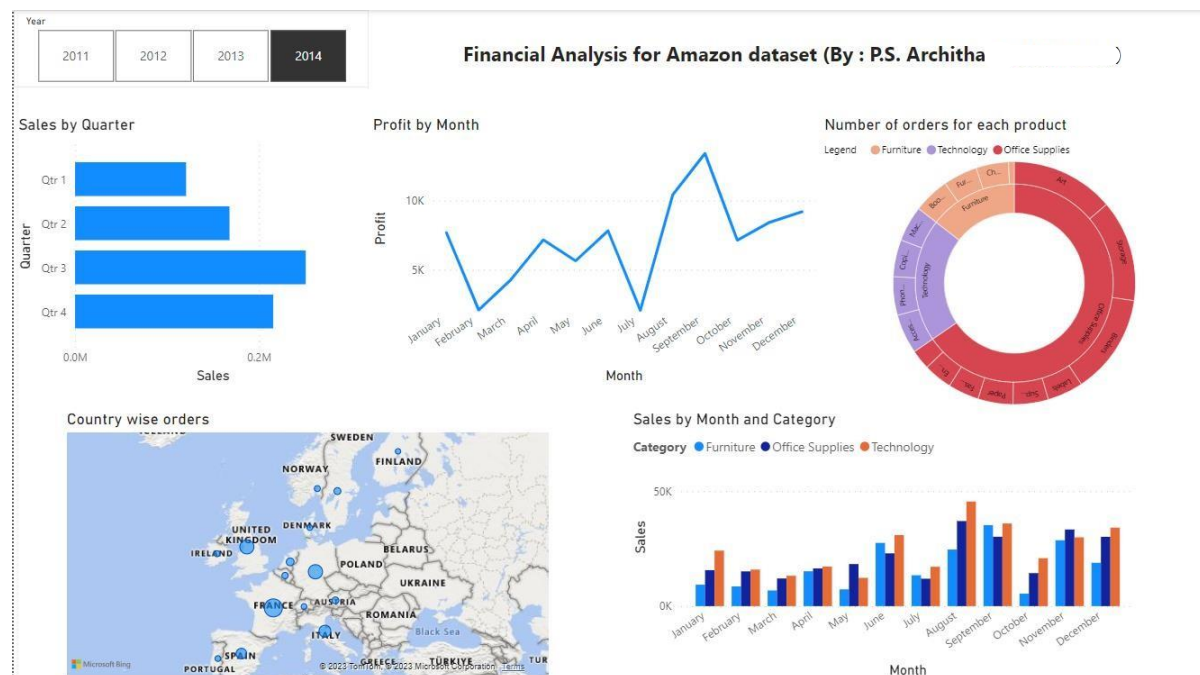

Year 2012

Year 2013

Year 2014

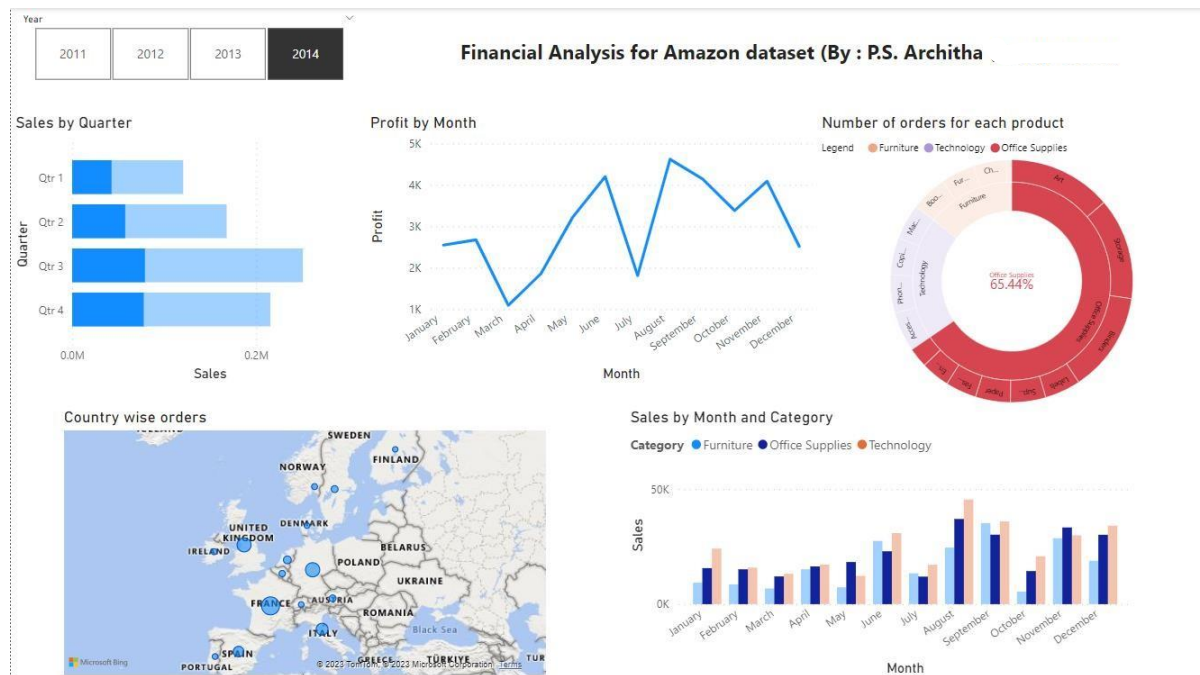

When each region of visualization is clicked, all visualizations show corresponding changes

Example:

When 'Office supplies' is clicked on the sunburst map. The 'Sales by Quarter' bar chart shows the sales of office supplies by quarter. The 'profit by month' line chart shows the profit gained each month due to sale of office supplies. The 'Country wise orders' map shows the country wise orders of office supplies. The 'Sales by Month and Category' bar chart shows the sales of office supplies by month and category.

Screenshot of the above explanation is attached below:

4. Inferences (For the year 2011)

A. Horizontal Bar Chart

From the above Horizontal Bar Chart, we can infer that the quarterly sales of Amazon increased each quarter consistently for the year 2011.

B. Line Chart

From the above line chart, we can infer that the Amazon sales increased in from January to December during the year 2011. It reached its peak during September. There was a sharp decline in sales the very next month i.e in October. However, The sales drastically increased in November.

C. Sunburst Chart

Number of orders for each product

Legend Furniture Technology Office Supplies

From the above Sunburst Chart, we can infer that Office supplies were ordered the most and within office supplies Art supplies, Binders and Storage items have more demand

D.Symbol Map

Country wise orders

From the above Symbol map, we can infer that most of the orders are from France and Germany. There are comparatively less orders from Portugal, Norway, Finland and Ireland

E. Grouped Bar Chart

Sales by Month and Category

Category ● Furniture ● Office Supplies ● Technology

From the above grouped bar chart, we can infer those sales of Office Supplies was highest in September. Technology sales were highest in August and Furniture sales were highest in December.
